to name a few.

Experience

Senior Web Developer
Luxury Rentals International www.luxuryrentalsinternational.com
www.luxuryrentalsinternational.com/backend

LUXURY
RENTALS
INTERNATIONAL

July 2016 – Present
I have proven leadership skills to provide authoritative direction, leadership and guidance on multiple concurrent system platform development, QA & Testing, delivery and support projects which impact corporate program delivery. Implementation and support of systems and web applications that enable core enterprise-wide real estate processes. Serving as an expert technical resource and consultant to projects for these applications and provides advanced level development and support for existing software. Using PHP, AJAX, JSON, jquery, bootstrap, mysql, javascript, HTML5, CSS3, LAMP, SEO campaign google adwords.

Systems Manager

El siglo, c.a. www.elsiglo.com.ve

October 2011 – December 2015 (4 years 2 months) • Maracay, Aragua

Provide authoritative technical leadership and expertise in Quality Assurance to oversee the design, development, deployment and on-going sustainment of high-profile I&IT platforms supporting significant business lines and resolve complex systems problems and critical incidents. Lead and participate in enterprise-wide or cross-jurisdictional projects and activities

Systems Analyst/Programmer

Netuno International www.netuno.com

April 2008 - May 2011 (3 years 1 months) • Weston, Florida

Evaluate and modify existing programs/systems as directed by business requirements. · Document all procedures to ensure conformance to departmental/corporate standards and procedures. · Conduct analyses of all defined system specifications to develop all levels of logic flowcharts for new programs or comprehensive information for data or process models; codes, prepares test data, tests, and debugs programs. Participate in production support activities in a maintenance environment.

Computer Software Engineer

International Business Link

March 2002 - March 2008 (6 years) • Weston, Florida

I acquired knowledge and experience with systems, QA, testing, design, development, implementation and integration of principles, practices and technology.

In addition, I specialize in web-based applications and multi-level technical environments to advise clients on IT solutions

I knew different operating systems (for example, Windows, LINUX), client / server, server technology, mainframe, fault tolerant environments and development tools

I have also learned about current methodologies related to system analysis, design, development, testing and implementation methods, data, applications, networks and security.

Applications Programmer

LAGOVEN, S.A.

February 2000 - January 2002 (1 years 11 months) • Caracas, DC

My responsibility was to ensure the application of best practices for the design, development, quality control and testing, implementation and operation of the technology, for multiple platforms of complex systems.

As well as developing systems integration and quality assurance strategies, identifying and evaluating the impacts of new solutions or improvements to existing services and infrastructure for performance, sustainability and robustness.

In addition to being able to understand, evaluate and develop solutions to mitigate risk.

I was able to assess and resolve critical incidents and develop protocols to address or avoid future incidents.

Software Engineer/Programmer

Electricity Of Caracas

March 1998 - January 2000 (1 years 10 months) • Caracas, Venezuela

I demonstrated the ability to lead multiple simultaneous project teams, including resource management, job assignment, performance monitoring and quality of service and deliverables, explaining work procedures.

I could be persuasive in presenting IT strategies and solutions, providing authoritative advice to solve contentious system problems, conducting customer / stakeholder inquiries, and bringing projects to a successful conclusion.

Systems consultant
Central Bank of Venezuela
December 1993 - February 1998 (4 years 2 months) • Caracas, Venezuela

I performed by demonstrating consultation and collaboration skills to conduct customer consultations and provide technical expertise.
Develop negotiation skills to negotiate customer service agreements and resource requirements, establish the scope of projects and deadlines; Manage resources in multiple simultaneous projects and ensure optimal service delivery.
Also the relationship management skills to direct meetings, discuss / determine priorities and resources, change direction of management and resolution of problems.
